

AYUSHI GOTHİ

Senior Frontend Developer | React.js | Next.js | TypeScript

Noida, UP | ayushigothi012@gmail.com | +91-8959482829 | LinkedIn | Portfolio | Github

Professional Summary

Senior Frontend Developer with 5+ years of experience building scalable, high-performance web applications using React.js 18, Next.js 14, and TypeScript. Proven expertise in Core Web Vitals optimization, reusable component architecture, and end-to-end product delivery. Mentored 5+ developers, defined team-wide engineering standards, and published an open-source NPM package.

Experience

SDE2 – Senior Frontend Developer | Unlink Technology Pvt. Ltd | Noida, UP

Jan 2024 – Present

- Architected and delivered 3+ production applications using React.js 18 and Next.js 14 (SSR/SSG), reducing page load time by 25% and improving Core Web Vitals from "Needs Improvement" to "Good".
- Eliminated 60% unnecessary re-renders using React.memo, useMemo, and useCallback — reducing Time-to-Interactive by 35% and improving Lighthouse score by 29 points.
- Led end-to-end product delivery for 3 live applications — from requirements analysis and UI architecture to CI/CD deployment and post-release monitoring.
- Implemented WCAG 2.1 AA accessibility standards (semantic HTML, ARIA labels, keyboard navigation), reducing accessibility issues by 40%.
- Built and maintained a shared component library of 40+ reusable, production-ready UI components adopted across 3 product teams, reducing duplicate UI code by 45% and cutting PR review cycle time from 3 days to 1 day.
- Mentored 5 junior developers through code reviews, pair programming, and tech workshops; 2 mentees promoted to SDE2 within 12 months.
- Collaborated closely with product managers, UX designers, and QA engineers in Agile/Scrum sprints, consistently delivering features on schedule with high code quality and minimal post-release defects.

SDE1 – Frontend Developer | Encoresky Technology Pvt. Ltd | Indore, MP

Jul 2021 – Dec 2023

- Maintained and enhanced a high-traffic SaaS platform serving 100K+ monthly active users, shipping 8 major feature releases over 2 years with zero critical production incidents attributed to frontend changes.
- Revamped 4 core product features using React.js and Material UI, improving user engagement by 15%.
- Engineered 15+ reusable UI components (data tables, form wizards, modals) using HOC and compound patterns — reducing UI dev time by 25% per sprint.
- Integrated 20+ REST API endpoints using Axios and Redux Toolkit (RTK Query) with request caching, error boundaries, and Redux Persist — reducing API-related failures by 50%.
- Delivered cross-browser compatible, responsive UI across Chrome, Firefox, Safari, and Edge for both desktop and mobile breakpoints, reducing browser-specific bug reports by 35%.
- Participated actively in Agile sprint cycles, contributing to sprint planning, technical estimation, daily standups, and retrospectives — consistently delivering committed story points on time.

Technical Skills

Frontend : React.js 18, Next.js 14, Vue Js, TypeScript, JavaScript (ES6+), HTML5, CSS3

State Management : Redux Toolkit, Redux Persist, React Context API

UI Styling : Material UI (MUI), Tailwind CSS, Styled Components, Responsive Design

Performance : Core Web Vitals, Lazy Loading, Code Splitting, useMemo, useCallback, React.memo

Testing : Jest, React Testing Library (RTL), Unit Testing, Integration Testing

Backend APIs : Node.js, Express.js (basic), REST API Integration, Axios, Firebase, GraphQL

Developer Tools : Git, GitHub, GitHub Actions (CI/CD), Webpack, Vite, ESLint, Prettier

Project Tools : Jira, Figma (collaboration), Agile/Scrum, Code Review

Deployment : Vercel, CI/CD Pipelines, Post-release Monitoring

Education

Master of Computer Applications (MCA)

Vellore Institute of Technology (VIT) | Bhopal

July 2019 – June 2021

Projects

React-Mobile-Share <https://www.npmjs.com/package/react-mobile-share>

Tech: React.js, TypeScript, Web Share API, Blob API, Rollup, NPM

- Designed, developed, and published an open-source React.js library enabling native mobile file sharing via the Web Share API — downloaded by developers worldwide.
- Implemented Base64 → Blob → File conversion pipeline for efficient binary data handling across image, PDF, and media formats.
- Integrated the Navigator Web Share API with graceful fallback mechanisms for unsupported browsers, ensuring cross-platform compatibility.
- Authored comprehensive documentation, usage examples, and TypeScript type definitions for a developer-friendly API surface.

Warely — Enterprise Web Platform

Tech: Next.js, TypeScript, Firebase Authentication, Material UI, REST APIs

- Architected and delivered a large-scale enterprise platform using TypeScript strict mode — improving code reliability, reducing runtime errors, and enabling safer refactoring across a 50K+ line codebase.
- Integrated Firebase Authentication with OTP-based mobile verification, implementing secure user onboarding flows with multi-factor authentication support.
- Ensured cross-browser compatibility and adaptive responsive layouts across 5+ device form factors (mobile, tablet, desktop, large screen), reducing platform-specific defects by 40%.

Payment Options — DASPOS Payment Internal UI System

Tech: Vue.js, TypeScript, Node Js, Prisma, Rest API, Axios, Vuex, CSS Modules

- Built a configurable internal payment management system using Vue.js and Vuex for state management, enabling the operations team to manage multiple payment providers through a unified dashboard.
- Developed backend APIs using Node.js and Prisma. Provider configuration, and reporting — handling secure data flow between frontend and database layers.
- Implemented Vuex-based centralized state management with modular store design, optimizing data flow and reducing redundant API calls by 35%.
